

# EXHIBIT 60

Getting started	1
Getting started with IBM Cloud Kubernetes Service	1
Understanding IBM Cloud Kubernetes Service	1
How to use IBM Cloud Kubernetes Service	1
Use cases	2
Learning paths	2
Release notes	2
Tutorials	3
Tutorial library for Kubernetes Service	3
Setting up your first cluster in your Virtual Private Cloud (VPC)	3
How to	3
Planning your Kubernetes environment	3
Preparing your account	3
Installing the CLI	3
Setting up the API	3
Creating clusters	3
Accessing clusters	3
Adding worker nodes	3
Managing the cluster and worker nodes lifecycle	3
Setting up encryption	3
Enhancing security	3
Managing access control	3
Securing cluster workloads	3
Controlling network traffic in Cloud clusters	3
Controlling network traffic in VPC clusters	3
Adding static routes to worker nodes	3
Configuring the cluster DNS provider	3
Setting up the Kubernetes dashboard	3
Logging and monitoring	3
Setting up monitoring by	3
Configuring integration and delivery for application and development	3
Developing and deploying apps	3
Setting up service mesh with Istio	3
Exporting data	3
Preventing data leaks from running container nodes	3
Deploying the Syslog agent on Kubernetes nodes	3
Enabling the IBM Cloud Operator Cluster addon	3
Setting up block storage for Cloud	3
Setting up block storage for VPC	3
Setting up file storage for Cloud	3
Setting up file storage for VPC	3
Setting up object storage	3
Setting up Redis	3
Backing up and restoring storage data	3
IBM Cloud storage utilities	3
Enhancing cluster capabilities with integrations	3
Managing cluster costs	3
Managing performance	3
Monitoring clusters	3
Reference	4
API reference	4
CLI plugin reference	4
